## Business Agility

InData helps businesses assess their state of cloud readiness. There is a lot of buzz around migrating business applications and data to the cloud. While there are many reasons to migrate, there are also pitfalls if not done correctly. InData provides a repeatable process for aligning business goals with technology strategies and avoiding the common pitfalls. Below are some key benefits you can experience if your business goals align with migrating to the cloud.

Files in the Cloud   **Servers in the Cloud**   **Backups in the Cloud**   **Windows in the Cloud**   **Email in the Cloud**

Benefits of Moving to the Cloud with InData

1) Preserve capital while having the flexibility to scale infrastructure

2) License critical IT software and hardware for a low monthly fee

3) Create business resilience with a second copy of your applications in the Cloud

4) Running your business in the cloud creates agility

5) Reduce risk of business interruption due to a power outage at your office

6) Already have IT resources in the Public Cloud? Directly connect to AWS, Google Cloud, and Microsoft Azure with Quality of Service (QoS) from the InData Cloud

7) Want a hybrid solution? InData can move your servers to our data center for co-location

8) Consolidate vendors! InData offers cloud hosting and technical support for your office infrastructure
